

Name: _____

Project #3 - Graphics

You will be creating three message screens and then running a sequence to play the messages back.

- Determine the three text messages in advance. These will count as a quiz grade.
- Open a new file
- Create three pages using insert on the windows toolbar or any other method you know.
- Use the mouse and the center text options to place the text on the screen.

Message #1: _____

- Select page two and in Attributes, change the font, spacing, leader, width and height attributes. Select a font that is appropriate for the nature of the messages.

Message #2: _____

- Select page three and in Color Attributes, change the Face, Edge, Shadow, and any other color attributes appropriate to the message.

Message #3: _____

- Use insert on the windows toolbar and select backgrounds or images for all three pages.
- In attributes, under the Effects tab, select patterns for both the in and out transitions. Change the transition times from 1.1 to 3.0 for both the in and out transitions. Also, change the wait time for only the in transition from 3.1 to 5.0. All of the above changes must be done for each of the 3 message pages.
- In attributes, under Run set the loop at 2, the Mode to auto (in/out) the loop wait at 4 seconds or below.
- Save your file as the section number and last name.
- Close your file.

If you would like to download this program, go to www.rsrocks.com. Under Remote Student, select Enter Site. On the left side select Downloads and select Download Now. Save it to your desktop and close out of all files. On the desktop, double click on gencg4 file. Double click on GenCG_462 and select run. Select next, 4 times, then Finish. On the Desktop, double click the GenCG icon. Click on register, it will ask for the following code:
