

Life Depends on Water ~ Saving Water Saves Lives

B e c o m e a

L i f e G u a r d

You can help guard our water supply
by following a few easy steps:

1. When it comes time for teeth brushing - life guards don't leave the tap gushing!
2. Life guards watch for trouble! They report leaks and drips on the double.
3. Life guards don't run water to get it cold. They keep a jug in the fridge - on hold.
4. Life guards spread the news, "Water conservation starts with you!"

Remember
Every
Drop
Counts
